

Message to the Youth

Siegmar Gerken

The Power of Life

We date the biological origin of life about 4 Billion years back. Since then, the unfolding of life never stopped and continues until today in the expression of the many wonderful lives that we are.

Life is precious, and in this manifestation and representation of you,

- in this body,
- at this time,
- on this planet,
- in this Universe,

there will never be another you in this exact combination of appearance and experience.

- So more I invite you to
- sense into your Essence,
- connect with your infinite potential,
- tap into the power of all existence,
- become aware of your unique qualities - and express and realize them in the world.

With empathy, competence, creativity and love - with the Will of Your Heart - you can create a shift in the fields that you are living in.

Stay in the resonance with the Flow of Life, the Flow of Love - co-create the world and participate in the larger fields of consciousness.

I am looking forward to meet you on this path, to learn from you, to dance with you, and to enjoy the colors of life.
